Subject: RE: May ARSG Meeting

What I wanted for 1b was a review of our traditional sample sites and then hopefully coordinate bug sampling using an appropriate protocol at as many sites as possible with TU, EPA, and ARSG. I also wanted to ask that you revise your bug data and fish data graphs of reflect the intervening years.

Peter will respond to your inquiry about 5a and 5c. We want to coordinate the use of what data there is and discuss what ARSG and EPA needs are and why. We have different requirements than EPA for their risk assessment but would like to coordinate our efforts as much as possible. I know we want to understand the direction you are envisioning for segment 3a, if any.

Bill

Hi Peter and Bill

Can you all let me know specifically what you all would like to discuss for bullets 1b, 5a and 5c?

Subject: May ARSG Meeting

Dear Stakeholders:

We did decide to meet in May in Silverton. It will on the fourth Tuesday which is the 27th. Attached is a draft agenda.

Please note that Red Mtn. Pass is closed from 8:00 am to 6:00 pm Monday through Saturday, except for 12:30 – 1:30 pm when traffic will be let through. CDOT is removing rock from a slide area near Ouray since a big slide came down several months ago. I suggest checking the COTRIP website for more up to date information if you plan to travel that direction.

Hope to see you in May.

Peter Butler
